

# Top tips for prevention and management of pressure injury

The following provides key points for clinicians to consider to avoid this hospital-acquired complication

Recommendation grades: Evidence based recommendations

**Grade A** = Excellent evidence - body of evidence can be trusted to guide practice

**Grade B** = Good evidence - body of evidence can be trusted to guide practice in most situations

**Grade C** = Some evidence - body of evidence provides some support for recommendation(s) but care should be taken in its application

**Grade D** = Weak evidence - body of evidence is weak and recommendation must be applied with caution
